

Task 22:

Explore major cloud service providers such as AWS, Google Cloud, and Microsoft Azure. Identify and compare their core services related to compute, storage, databases, and networking, along with the pay-as-you-use pricing model.

Aim

To explore major cloud service providers such as **Amazon Web Services (AWS)**, **Google Cloud Platform (GCP)**, and **Microsoft Azure**, and compare their core services related to **compute, storage, databases, and networking**, along with the **pay-as-you-use pricing model**.

Algorithm

1. Identify major cloud providers:
 - AWS
 - GCP
 - Azure
2. Study core services:
 - Compute
 - Storage
 - Database
 - Networking
3. Compare equivalent services across providers.
4. Analyze pricing model.
5. Summarize differences and use cases.
6. Present comparison in tabular form.

Category	AWS	GCP	Azure
Compute	EC2	Compute Engine	Virtual Machines
Storage	S3	Cloud Storage	Blob Storage
Database	RDS	Cloud SQL	Azure SQL Database

Category	AWS	GCP	Azure
Networking	VPC	VPC	Virtual Network
Serverless	Lambda	Cloud Functions	Azure Functions

Result

Studied major cloud providers Compared core services Understood pricing model Identified best use cases for each platform
